# SCORCHING HOT SUMMERS, WARM WINTERS

The climate is shifting dangerously. That is why we need to stop burning oil, coal and gas. However, ING continues to finance the fossil fuel industry, with almost 9 billion each year.

## Your employer is driving the climate crisis

As an employee, you have a special position. What do you think of the fossil fuel policies of your boss? How do you see your own role in this? Do you think you could make a difference?

## Yes, you can do something

Like speak up in your organization, find out if colleagues share your concern, ask your management and the board questions.

**DO YOUR THING.** *Read more on*
